# WHAT IS INCENTIVE TRAVEL?

Some employers offer incentive programs for their employees – and our unparalleled river cruises are the perfect reward. While oceans take people to countries, rivers take people through them. That means, while there are occasional periods of scenic cruising, every day with AmaWaterways is a “see” day. Our ships dock in fascinating destinations, and guests are able to step right off the ship at their leisure without waiting in any lines, often within walking distance of the city center or town square.

Expertly prepared cuisine

## THE ULTIMATE INCENTIVE

Guests are pampered by our extraordinary crew and treated to complimentary wine during lunch and dinner, as well as wine, beer and cocktails during our daily Sip & Sail cocktail hour. With excursions, fine dining – including a multi-course tasting menu at The Chef’s Table specialty restaurant – high-quality Wi-Fi and more included in the price of the cruise, exceptional employees will delight in the incentive they’ve received, while employers benefit as well.

## VALUE FOR EMPLOYERS AND EMPLOYEES

Our intimate river cruise ships accommodate an average of just 150 guests, ensuring employers have a captive audience for any special meetings or seminars they wish to present on board, as well as a number of inviting venues they can use to meet in smaller groups. Above all, treating their employees to such an exceptional river cruise experience will inspire both hard work and loyalty among your clients’ teams.

Extraordinary crew

## PEACE OF MIND

AmaWaterways played an industry-leading role in the early adaptation of health and safety protocols within the river cruise sector. Guest feedback continues to confirm we deliver an exceptional experience while protecting our guests and crew with enhanced protocols. In addition, we are currently only welcoming guests who are fully vaccinated against Covid-19 on board our ships and our crew is fully vaccinated as well. Further, our river cruise ships sail along national waterways, ensuring that guests will always have access to medical care on shore and will never be “left at sea.”
